

# Workshops, Seminars, & Masterclasses

presented by Meredith Colby,  
author and expert on neurodidactics for vocal development

## How To Teach High, Rock, "Belt"

Help your singers unlock a powerful, sustainable high mix—with tools rooted in neuroscience and real-world coaching. This workshop gives voice teachers two practical techniques and a surprising insight into one innocent word that could be holding your students back.

## Wired To Learn: Motor Memory & Attention in Action

## Wired To Learn: Motor Memory & Attention in Action

In this hands-on workshop, you'll learn how motor memory and attention actually work—so you can stop interrupting learning and start accelerating it. Get neuroscience-backed coaching strategies that create lasting vocal change for students in any style.

## COACHING IS *Swanky!* a short workshop that just might change everything

## Coaching is Swanky!

What if your students could lead their own breakthroughs? This workshop explores how goal-oriented, context-aware coaching helps singers self-assess, make artistic choices, and grow faster. Learn the language and mindset of effective coaching—for more empowered, expressive clients.
